

Discover Glass Block:

**WHERE LIGHT  
MEETS SERENITY**

## MULIA HISTORY

Mulia Glass has been at the forefront of glass manufacturing for decades, providing high-quality glass products, including float glass, automotive glass, glass blocks, and glass containers.

Our commitment to innovation, precision, and excellence ensures that we deliver superior products to meet diverse market needs.

In 2020, Mulia Glass Block division expanded its production capacity to 84,000 tons/year, reinforcing our position as a leading glass manufacturer in the world. With continuous advancements in technology and production efficiency, we strive to exceed industry standards and offer unmatched quality in every product.

To better serve our North American distributors, Mulia Inc. was established in 1992 in California.

Our dedication to continuous improvement on quality and service has propelled Mulia Glass to become one of the most trusted and largest glass manufacturers in the world.

## METAL PAINT – COLLECTION

The Metal Paint Collection combines industrial strength with modern elegance, offering a sleek, metallic finish that enhances both durability and style.

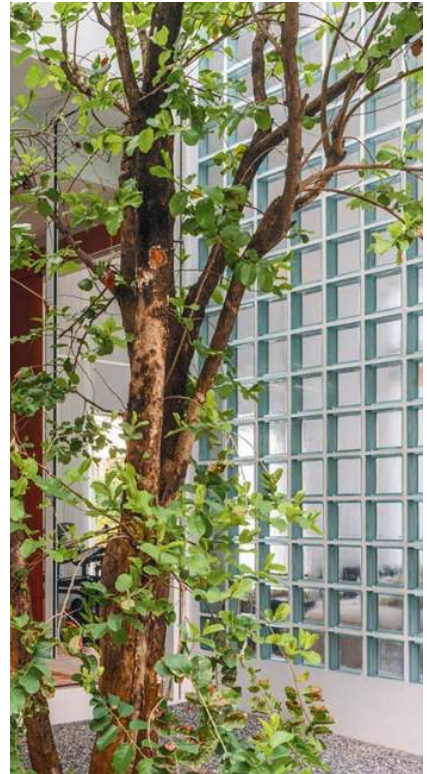

# INTERIOR APPLICATION

EXTERIOR APPLICATION

- 1** Ensure the surface where you'll be installing the glass blocks is clean, level, and free from any debris.

- 2** If you're installing them in a wall, make sure the opening is framed properly and has adequate support.

- 3** Follow the manufacturer's instructions to mix the mortar to the desired consistency.

- 4** Using the mortar trowel, apply a layer of mortar to the bottom of the opening where the glass blocks will be placed.

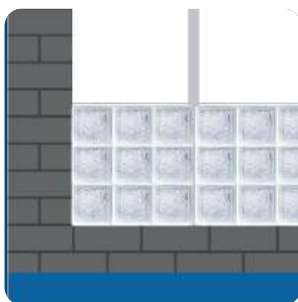

- 5** onto the mortar bed, pressing it

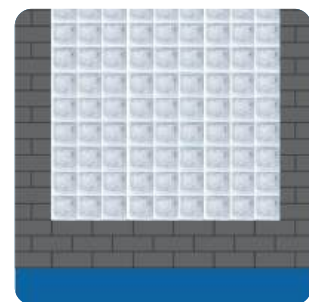

- 6** Use a level to ensure the block is plumb and level in all directions. Insert spacers between the blocks to maintain even spacing.

- 7** Repeat the process, adding mortar and placing each glass block one by one until you've completed.

- 8** Once all the blocks are in place, mortar using a mortar trowel.

- 9** Clean off any excess mortar from the surface of the glass blocks using a damp sponge.
